

BIOLA UNIVERSITY

What is R.A.D.?

The **Rape Aggression Defense System** is a program of realistic, self-defense tactics and techniques. It is a comprehensive course for women that begins with **awareness, prevention, risk reduction and avoidance**, while progressing on to the basics of hands-on defense training. **R.A.D. is not a martial arts program.** Our courses are taught by certified R.A.D. instructors and provide you with a workbook/reference manual. This manual outlines the entire physical defense program for reference and continuous personal growth. The R.A.D. System of Physical Defense is currently being taught at many Colleges and Universities. The growing, widespread acceptance of this system is primarily due to the **ease, simplicity and effectiveness** of our tactics, solid research, and unique teaching methodology.

The R.A.D. Systems is dedicated to teaching women defensive **concepts and techniques against various types of assault**, by utilizing **easy, effective and proven self-defense tactics.** Our system of realistic defense will provide a woman with the knowledge to make an educated decision about resistance.

R.A.D. OBJECTIVE;

“To develop and enhance the options of self defense, so they may become viable considerations to the woman who is attacked.”

- Somewhere in America, a woman is sexually assaulted every 2 minutes, according to the U.S. Department of Justice.
- Approximately 68% of rape victims knew their assailant. [Violence against Women. Bureau of Justice Statistics, U.S. Dept. of Justice, 1994]

Safety and survival in today’s world requires a definite course of action. We provide effective options by teaching women to take an active role in their own self-defense and psychological well being.

Course Description

One P.E Unit Basic Physical Defense class:

Part 1

Utilizing the R.A.D. student manual, students will be involved in a discussion of risk reduction strategies, date rape, continuum of survival, defensive strategies and the basic principals of defense. We also discuss the pros and cons of defensive weaponry, how to develop a defensive mindset, understanding offensive and defensive postures, recognizing vulnerable locations and utilizing personal weapons.

Part 2

Participating students will begin the process of hand on training. The techniques utilized by R.A.D. Systems are based on simple gross motor skills and are developed to the point that they become instinctual through repetition. Students will have the opportunity to use these techniques in dynamic impact training by striking padded equipment held by the instructors. All techniques target a single attacker.

Part 3

Participating students will continue to refine the skills previously learned with “practice, practice and practice.”

Part 4

Students will then participate in “simulated assault” scenarios with R.A.D. instructors, who along with participants, wear state-of-the-art protective gear specifically designed for this training. Women have the opportunity to utilize their skills in a safe training environment.
